Available accessories:

Reorderable semi-annual replacement pack, item no.: 59115

- 2 x PI filter cartridge – 3 months usage,
- 2 x limescale filter pad with closure – 3 months usage

Product data

Item no.	59106
EAN	4 260451 491864
Material	Food-safe SMMA plastic, BPA-free*
Functionalities	Water filtration, vitalisation
Capacity	Fill compartment: 0.8 l; jug reservoir: 2 l
Special features	100% Made in Germany. No power or tap water connection required
Dimensions WxHxD	24 x 25.5 x 15 cm
Warranty non-commercial use	2 years
Certified quality	BPA-free*, 

Available colours: white

The original ... your everyday source for drinking water.
Kini filtration jugs are 100% developed and manufactured in metropolitan Berlin by Maunawai to meet all requirements for vitalising filtration. Requires no power or tap water connection; sophisticated filtration system operating solely by gravity. Recommended by Anthony William.

Convenient filtering, harmonised water.

Maunawai® water filters remove chlorine, heavy metals, uranium, pesticides, nitrates, hormones and drug residues from tap or bottled water in just minutes ... while even reducing limescale. The original cluster structure of the water is restored to how it occurs in fresh spring water - and you can taste it. In the practical jug, water passes through a multi-stage filtration process that yields optimal bioavailability for revitalising the human organism. Certain valuable minerals are retained in the purified water.

Practical and environmentally friendly.

The Maunawai® Kini water filtration jug is made of durable SMMA plasticiser-free plastic. There is no measurable particle release into the water, even with heavy use. The jug material meets the most stringent standards for biocompatibility and food safety. The jug is 100% recyclable; the Maunawai® Kini packaging is 100% recycled paper.

*All food-contacting parts BPA-free.
