

Dahlert Slow Juicer DT-SJ-19

Brushless cleaning
in less than 3 minutes.

- ✓ Patented technology for ultra-fast cleaning
- ✓ Produces top-quality juice
- ✓ Sloped design so every drop drips out
- ✓ Puree and smoothie inserts included

*All food-contacting parts BPA-free. **For non-commercial use, all parts except motor covered *** on the motor for non-commercial use.

Dahlert Slow Juicer DT-SJ-19

Scope of supply

- Motor unit
- Press roller
- Press roller housing
- Hopper
- Juice outlet cap
- Fold-up pulp outlet
- (orange)
- Fine juicing sieve
- Smoothie juicing sieve
- Dual sieve insert
- Puree insert
- Tamper

Available colours: Gun Metal

Product data

Item no.	53101
EAN	8 809069 580018
Housing material	BPA-free* plastic
Functionalities	Juices, smoothies, puree
Max. running time	30 minutes/1.5 litres
Special features	Ultra-fast cleaning in 3 minutes
Speed	43 rpms
Dimensions B x H x T	21 x 46 x 29 cm
Weight	9,5 kg
Motor capacity	150 watts
Voltage	220-230 V
Warranty (non-commercial use)	2 years, motor 10 years
Certified quality	BPA-free*, 

Unique sieve technology affords incredibly fast cleaning.

A superior slow juicer for fine juices - thanks to special technical qualities of sieve and housing. With Dahlert, cleaning is unbelievably easy. Instead of the typical porous design of juicing sieves, where fruit and vegetable fibres get stuck, this sieve is slotted, allowing brushless cleaning. This unique, innovative technology in combination with the fold-up pomace outlet affords quick and easy cleaning. The average cleaning time in testing was 3 minutes. No other juicer in the world is that quick to clean!

This smart system is developed and manufactured in Korea. The inventors came up with an ingenious design for sieve holder and three different inserts (for juicing, smoothies and pureeing).

Sophisticated technology from top to bottom.

Juicers of this calibre feature anti-overheating and anti-overload mechanisms of course, ensuring safety for man and machine. What's more, many sorts of fruit and vegetables almost automatically get drawn into the juicer. If something gets stuck, just use the tamper to easily clear the jam.

The Dahlert Slow Juicer has 2 intakes into the juicer. The wider hopper section is convenient for smaller ingredients like berries and tomatoes, while the 4.5 cm-wide vertical hopper opening is for celery, carrots and coarsely chopped fruit and vegetables. The juice chamber is designed with a 7° decline so the juice runs out completely, like down a slide.

*All food-contacting parts BPA-free.
