

Dahlert Water Filter DT-WP-2019

Revolutionary Reverse Osmosis Water Filter.

- ✓ Stylish 5-layer water filter for unsurpassed purity
- ✓ Innovative reverse osmosis technology with settable temperature
- ✓ More than 100 patents utilised
- ✓ Easy to clean
- ✓ No maintenance – just annual filter change

*All food-contacting parts BPA-free. **for non-commercial use.

Dahlert Water Filter DT-WP-2019

Scope of supply

- Water system
- Filtration and reservoir tanks
- Drip catcher
- 5-in-1 filter cartridge

Product data

| | |
|-------------------------------|---|
| Item no. | 69201WE |
| EAN | 6 939815 605305; Replacement cartridge: 6 939815 605299 |
| Housing material | BPA-free* plastic |
| Functionalities | Reverse osmosis water filtration |
| Capacity | 3 l, .08 l reservoir; Filtration speed 0.25 l / min. |
| Settable water temperature | 85° / 40-45° / ambient temperature |
| Special features | Innovative technology involving 100 patents |
| Dimensions WxHxD | 24.5 x 43.5 x 24.5 cm |
| Weight | 8,7 kg |
| Motor capacity | 420 watts |
| Voltage | 220-230 V |
| Warranty (non-commercial use) | 2 years CE |
| Certified quality | BPA-free*, |

Available colours: white

100 patented technologies in a single system.

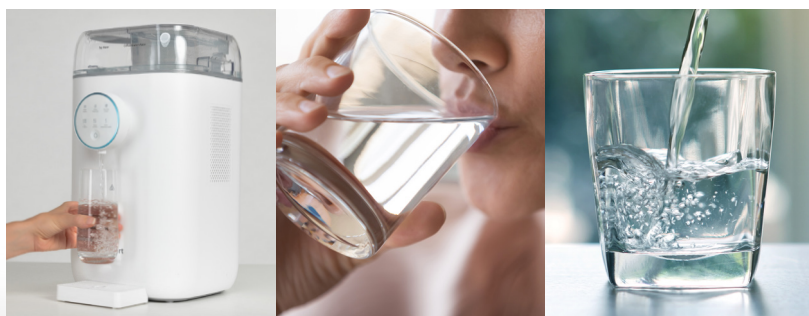

Reverse osmosis water filtration is the ultimate for many customers, who love the light and completely pure water they get to enjoy without a care, knowing that all impurities have been removed. What's left: pure, crystal clear water. As a reverse osmosis system, the Dahlert water filter features some crucial differences. Starting with the 100 patented technologies integrated into the system. This portable filtration unit has a number of advantages over systems permanently installed in the kitchen. For while getting the ultimate in pure drinking water, portability means your customers are no longer tied to the municipal water network. The Dahlert filter is for home, office and travel.

Innovative technology.

Innovative plug&play filter changing: hassle-free switch-out in 30 seconds or less once every 12 months (if filtering tap water). 5-in-1 filter cartridge means no decalcifying or disinfecting required for 12 months (or 3,500 litres). The system notifies you if the 3,500 litre limit is reached before 12 months.

'Some like it hot'.

The choice is yours: settings allow you to draw water from the system at room temperature, warmed at 45°C (113°F) or hot at 85°C (185°F) - just perfect for white or green tea. Heating takes place in a 0.8 litre stainless steel reservoir, taking only a few seconds. Water at room temperature remains available at all times.

*All food-contacting parts BPA-free.
