

## Maunawai PI PRIME K8 Tabletop Springwater System

# Gravity filtration system – recommended by Anthony William

- ✓ Tap water transformed into fresh "spring water"
- ✓ 8-litre upright filtration system
- ✓ For medium-hard to hard water
- ✓ Purifies, vitalises, restructures
- ✓ Blown-glass reservoir

\*All food-contacting parts BPA-free. \*\*for non-commercial use

## Maunawai PI PRIME K8 Tabletop Springwater System

### Scope of supply

- 6-layer PI®PRIME tabletop springwater filter
- Ceramic filter
- 4-litre filtration tank with lid
- 8-litre reservoir with tap Stand
- Product manual in German

#### Available accessories:

- Refresh packets, item no.: 59114
- 1 Refresh packet included (reorderable, change out every 10-12 months)

### Product data

Item no.	59105
EAN	4 260451 490027
Material	BPA-free* plastic
Functionalities	Water filtration, vitalisation
Volume	Filtration tank: 4 l, Fountain tank: 8 l
Special features	No power or tap water connection required, Cleans, vitalises and restructures water
Dimensions WxHxD	30 x 55 x 30 cm
Weight	7.8 kg
Warranty non-commercial use	2 years
Certified quality	BPA-free*, 

Available colours: white

**Maunawai® PI®PRIME K8 Water Filter System – pure enjoyment with every sip.**

Prominent "Medical Medium" Anthony William recommends gravity water filtration to purify and revitalise ordinary drinking water, as part of a health-aware lifestyle. Manufactured in metropolitan Berlin for several years now, Maunawai® PI®PRIME K8 Water Filter Systems are known for both ease of operation and excellent results.

#### Sophisticated multi-stage filtration system.

A multi-stage filtration system is at the heart of the Maunawai® springwater fountain. In stage one, a ceramic filter captures impurities, particles and suspended matter. The water then passes through a filter pad that removes limescale via ion exchange. Then in the last stage the water passes through an activated carbon filter made from coconut shells, removing chlorine, pesticides and many other residual impurities. This is why Maunawai® filters are extremely effective, even with notoriously poorly binding substances in the water supply like copper, drugs and hormones. This seeping filtration process yields soft, pure water, like from a mountain spring.

The filtration tank of the Maunawai® Water System has capacity of 4 litres. The reservoir beneath, made of hand-blown glass, has capacity of 8 litres.

All plastic parts are of the kind utilised in medical devices: plasticizer-free, BPA-free SAN plastic. The Maunawai® Water System is thus an ideal source of vitality for the kitchen or office, for guests and for customers.

\*All food-contacting parts BPA-free.
