- Pasta and grissini set (6 nozzles)
- Tamper
- Juice catch (BPA-free)
- Pulp catch (BPA-free)
- Foam sieve
- Cleaning brush
- User manual in English

Available colours: Gunmetal

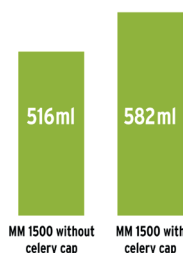

Omega Juicers MM1500: the top-end model of the MM-Omega Juicers line by Anthony William.

You get superior juice yield, as with the MM900, but also extra functionalities allowing you to create healthy snacks aligned with Anthony William's diet recommendations. Yet while the MM900 is designed for individual daily juicing requirements of 0.5 litres, the MM1500 can juice up to 1.5 litres in one go. The screw press is the same as in the MM900, but all other parts are differently manufactured for much greater durability. The hopper is now affixed to the juicer housing and is larger in size at 5 cm as compared to 4.5 cm. The locking ring and cap are larger now as well, and the juicing sieve has been modified for greater volumes. The MM1500 comes with a wide range of accessories, enabling food pureeing in addition to juicing. Makes excellent fruit and vegetable purees, frozen fruit sorbets, butter spreads, plant-based beverages, energy balls and doughs for pasta and grissini.

Benefits at a glance:

- Personally recommended by Anthony William
- Specially designed celery cap ensures superior celery juice yield
- Makes many other juices too
- Robust and durable for up to 1.5 litres juice yield
- Includes pureeing insert for butter spreads, sorbets, energy balls, pasta and grissini dough ... and much more.
- Larger 5 cm input chute

Juice yield from 700 g celery

*All food-contacting parts BPA-free.
